

Fake News, Real News

What you see is what you believe
But that's not the case in reality
These articles are so full of lies
These articles are what I despise
Reality TV is more important apparently
Rather than the reality outside of TV
Movie stars climbing to the top
Whilst trusted journalism is falling off
They make up fake news
And it's all just for the views
Untrusted websites are what you choose
With "stories" of celebrities who had too much booze
And you know where everyone is intrigued?
The top sixteen teams in league
Nobody cares about the real news these days
What's with all war zones, drought places and tornadoes?
Why is all this happening?
Pay attention to your surroundings
Do you know where your clothes are made?
Countries using hundreds of kids to work at our age.
Do you think you know about all the violence
Because all these things are going unnoticed
So why don't you pick up a newspaper and start reading?
Because I bet you'll learn a lot of new things.
